

ESB Customer Supply Response

to

**Consultation on Retail Trading of Non Participant
Generation in the Single Electricity Market in Ireland
CER/06/151**

Issue Date : 30th August 2006
Document Status: Final

Comments

ESB Customer Supply (ESBCS) welcomes the proposal by the CER to allow de-minimis generators to sell their output to up to a maximum of three suppliers while remaining outside the SEM.

As detailed in our response to the Regulatory Authorities' draft decision paper on Non-SEM Trading, ESBCS considers that it would offer a de-minimis generator greater flexibility and reduce the administrative burden on the System Market Operator if he were allowed to remain outside the pool but be allowed to sell his output to more than one supplier.
