Dear Mr Hogan,

We were most alarmed to hear of your proposals on "net metering".

Our organisation has been aiming to tackle fuel poverty (affecting 24% of the population in N.I.) in a number of ways of investing

- Insulation
- Windows/doors
- solar water for heating in a C.H. system
- PV for electricity (small 2/3kw)

Combined together these measures are sufficient to significantly alleviate or eliminate fuel poverty.

Your proposal shuts the door on our attempts to help the poorest in society — and directly contradicts the STERN report.

Sorry not to have typed this out — but we have just realized the date for your consultation is tomorrow.

Yours B Cooke.
