Re: Bord Gáis Networks Connections Policy

Dear Gerry,

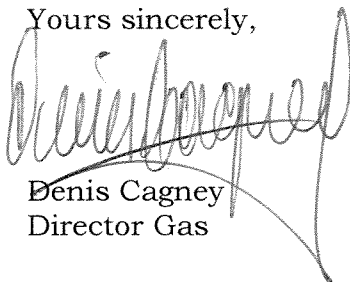

I write further to the Commission's recent consultation¹ concerning a number of proposed clarifications and an amendment to the Connections Policy. Specifically they cover:

- Payment options for new Medium and Small I&C customers who require a Large Network Connection Agreement (LNCA).
- The allocation of reinforcement costs for new I&C customers.
- The treatment of economic bypass where a distribution connected customer seeks connection directly to the transmission system.

There were no responses to the Commission's public consultation process. In light of this, and further consideration of the proposals, the Commission hereby directs BGN, in accordance with Section 14(3)(b)(i) Gas (Interim Regulation) Act 2002, as amended by SI 320 of 2005, to implement the updated policy, as incorporated in the attached updated version of the BGN Connections Policy Revision 1.1.

This letter and attachment are being published on the Commission's website today.

Yours sincerely,

Denis Cagney
Director Gas

CC Michael G. Tutty (Commissioner)
