

Mr J. Burke

Ref. QK Cold Stores Ltd., Carrolls Cross and Grannagh

I understand it is proposed to bring back the levy again.  
At a time when our business is struggling to come to grips with the enormous increase (32% in our case) in energy costs the last thing we need is another increase.

At this time all the players in energy supply should be coming together to lighten the burden on the customer. Otherwise thousands of jobs will be lost.  
Industry will be driven out of the Country at an even faster rate than at present.

I trust you will take on board the foregoing and permanently abolish this levy

Regards

Jim
