The Licensee shall comply with any directions issued for the purposes of this Condition.

(b) Where, in relation to the accounting statements in respect of a financial year, the Licensee has changed such bases of charge, apportionment or allocation from those adopted for the immediately preceding financial year, the Licensee shall, if so directed in directions issued by the Commission for the purposes of this Condition, in addition to preparing accounting statements on those bases which it has adopted, prepare such accounting statements on the bases which applied in respect of the immediately preceding financial year.

**Condition 3: Prohibition of cross-subsidies**

1. This Condition applies:
   
   (a) where the Licensee (taken together with its affiliates and related undertakings) is in a dominant position in a market for the supply of electricity to final customers, which shall be determined by the Commission in accordance with Condition 5; and
   
   (b) where the Licensee also carries on a Generation Business.

2. Where this Condition applies, the Licensee shall procure that the Supply Business does not give any direct or indirect cross-subsidy to, nor receive any direct or indirect cross-subsidy from, any other business of the Licensee or of an affiliate or related undertaking of the Licensee.

3. Nothing which the Licensee is obliged to do or not do pursuant to this licence or any other licence granted to the Licensee under the Act shall be regarded as a cross-subsidy for the purposes of this Condition.

5. For the purposes of this Condition, the Commission shall determine any question as to:
   
   (a) what is or is not commercially sensitive information; and
   
   (b) what constitutes a cross-subsidy.
**Condition 4: Prohibition of discrimination in supply**

1. This Condition applies where the Licensee (taken together with its affiliates and related undertakings) is in a dominant position in a market for the supply of electricity to final customers, which shall be determined by the Commission in accordance with Condition 5.

2. Where this Condition applies, the Licensee shall not supply or offer to supply electricity to final customers in any market for the supply of electricity in which it is dominant on terms which are predatory.

3. Where this Condition applies, the Licensee (taken together with its affiliates and related undertakings) shall not, in supplying or offering terms for the supply of electricity to final customers in any market for the supply of electricity in which it is dominant:
   - show undue preference to any person (or class of persons) within such market;
   - exercise undue discrimination between any persons (or classes of persons) within such market; or
   - set terms which are unduly onerous.

4. For the purposes of this Condition, terms are unduly onerous if the revenue from the supply of electricity to final customers on those terms:
   - significantly exceeds the costs of that supply; and
   - exceeds such costs to a significantly greater degree than the revenue from supply to all other final customers of the Licensee (and of its affiliates and related undertakings) within the same market.

5. In this Condition:
   
   “terms” means all the terms on which a supply of electricity is offered or provided, including terms as to price, which significantly affect the evaluation of that supply.

2. In determining, for the purposes of Conditions 3 and 4, whether any persons constitute a class of final customer, due regard shall be had to the circumstances of supply to such final customers including (without limitation) volumes, load factors, conditions of interruptibility, location of premises being supplied and date and duration of the supply contract.

3. For the purposes of Conditions 3 and 4, the Commission shall determine any question as to:

   (a) whether any area or class of final customers constitutes a market for the supply of electricity;

   (b) whether the Licensee (taken together with its affiliates and related undertakings) is dominant in any market for the supply of electricity;

   (c) whether there is established competition in respect of the supply of electricity in any area or to any class of final customers; and

   (d) whether any terms are predatory, having due regard to whether such terms:

       (i) incorporate charges which do not reasonably cover the avoidable costs incurred in consequence of supplying the class of final customers in question; and

       (ii) are intended or are likely to restrict, distort or prevent competition in the supply of electricity.

4. Having first consulted with the Licensee and such other persons as it considers appropriate (and having taken into account any representations made to it), the Commission may determine that the Licensee is dominant in a specified market for the supply of electricity, and where the Commission does make a determination it shall thereafter notify the Licensee as soon as is reasonably practicable.

5. If the Licensee believes it is no longer dominant in a specified market for the supply of electricity, it may submit this issue to the Commission for redetermination.

   (c) such other detailed terms as are or may be appropriate for the purpose of the agreement.

4. The Licensee shall, and shall procure that any affiliate or related undertaking of the Licensee shall, offer terms for agreements in accordance with paragraph 2 as soon as practicable after the receipt by the Licensee or affiliate or related undertaking of the Licensee, as the case may be, of an application containing all such information as it may reasonably require for the purpose of formulating the terms of the offer.

5. The Commission may, on the application of the Licensee, issue a direction relieving the Licensee of its obligations under paragraph 2 in respect of such relevant metering equipment and subject to such terms and conditions as may be specified in the direction.

6. The Licensee shall not, and shall procure that any affiliate or related undertaking by the Licensee shall not, enter into an agreement with any person for the provision of an electricity meter at any premises (whatever the nature of that agreement) which is intended or is likely to restrict, distort or prevent competition in the supply of electricity.

   (a) that the person should pay to the Licensee the whole or an appropriate proportion of the costs directly or indirectly incurred by the Licensee in the sale, hire or the loan of any relevant metering equipment;

   (b) that the performance by the Licensee of its obligations under the agreement should not cause it to be in breach of any other Condition of this licence or any other statutory requirement;

   (c) that any methods by which the relevant metering equipment is installed (if applicable) shall be in accordance with good industry practice;

   (d) that the terms and conditions of agreements entered into by the Licensee pursuant to an application in accordance with Condition 7 should be, so far as circumstances allow, as similar in substance and form as is practicable.

2. If the person wishes to proceed on the basis of the agreement as settled by the Commission, the Licensee shall forthwith enter into and implement such agreement in accordance with its terms.

3. If either party to an agreement for the provision of any relevant metering equipment entered into pursuant to Condition 7 or this Condition proposes to vary the contractual terms of such agreement in any manner provided for under such agreement, the Commission shall, at the request of the Licensee or the other party to such agreement, settle any dispute relating to such variation in such manner as appears to the Commission to be reasonable having regard (insofar as relevant), in particular, to the considerations set out in sub paragraphs (a) to (d) of paragraph 1.

   and by publishing such information in such manner as will secure adequate publicity for it.
