Consultation on Installed Capacity Cap

11 Oct 2013

Dear Nigel,

I would like to comment on your document CER /13/210 as follows:-

Atlantic Wind supports the proposal of an increased installed capacity cap of 120% of the MEC.

Atlantic Wind requests that when making their decision the CER applies the decision to all categories of Windfarm, i.e. new built and existing windfarms are treated equally.

Thank you for considering my submission

Yours sincerely,

Michael Duffy

Atlantic Wind
