Re: Water Charges Dear Sarah,

My husband, [REDACTED], and I have medical problems and we are very concerned and anxious about the impact of the water charges on our situation.

[REDACTED] has a problem with the prostate gland and I suffer from colitis. Both conditions require the use of quite an extra amount of water from the norm, both day and night, .

I am retired and my husband is on an invalidity pension.

Is there any way in which our situation can be considered in setting the water rate for our house?

Yours sincerely,

[REDACTED]
