[REDACTED] Sarah Foley, Analyst-water division. Domestic water tariff principles and proposals

[REDACTED]

I am a resident of Belgooly village and the water quality currently has a high concentration of iron and manganese and a high level of hardness (300-400ppm).

I believe that the water is not fit for purpose .

I would ask the regulator that the village of Belgooly be given a wavier for water charges till this is rectified i.e a simple matter of connecting Belgooly to same water scheme as Riverstick a village 3 miles down the road.
