To whom it may concern

I am not one bit happy with these water charges that Irish water ltd will be trying to impose on the people of Ireland (as we already pay for water through general taxation) . I have to ask the question would you go in to a shop and pay for the same thing 2,3,4,5 times over ??? I will even do you the decency of answering thatno you would not .

It is an absolute disgrace that you would even consider letting a private company charge us for something we already pay for .

Regards
