Subject: Submission on water charges

Dear Sir,

The proposed public water supply charges and sewage treatment charges will not cover the full cost of providing these services. Public money of approx 1 bn euro will be given to irish water to subsidise these services, which are provided to approx two thirds of the population.

As I am not in receipt of these so called "public services" I have to provide these services at my own expense. I believe that I am being discriminated against.

I believe that in equity, I should get equal consideration that customers of irish water will get, and that I should be given some money to cover some of the cost of providing my own water supply and sewage disposal.

Yours sincerely,
