Submission to CER re: Irish Water

My submission is as follows, who gave the government the right to hand over our water supply to a private company? In Bunreacht na h-Eireann all resources are belonged to the State - the State is the people. Irish Water is in breach of the Lisbon Treaty. Where do the Government get their alleged sovereign authority from? No licence to supply Fluoride. Money Stolen from the Central fund/ LPT to set up a private company. No contract can be enforced on any consumer from a private or public entity. See EU contract Law. This Irish water Scam is actually in breach of the Criminal Justice Act. Section 27. blackmail, extortion, making demands with menace. Gardai also being used to aid a private company in the coercion of citizens to take a meter. This is corruption on par with Russia.

Please do no spout about the water services act, as the constitution is higher than any law and thats a fact.

Beware of an awakening of people.

I will swing in the gallows before I pay for water twice.

Is mise le meas.
