Subject: Water Charges Deception

We

[REDACTED]

Object strongly to the way we were deceived with the new proposed water charges. While we accept the fact that we must pay our share, we were anticipating budgeting 240 Euros as we were led to believe the average annual charge would amount to. There was no mention of a double charge for households on public drainage systems. Therefore we are asking that we pay the annual charge of the said 240 Euros, or provide us with a greater allowance, or reduce the price per litre in order for us to be able to achieve the average household figure of 240 Euros.

Household metering is surely time enough when most of the millions of gallons of unmetered treated water leaks in the public network system are reduced.
