Submission

I wish to make the following submission and I thank you for the opportunity.

[REDACTED]

I have a 1,000 gallon collection tank for rain water off of our home. We use this for all of our toilets and showers. We also have a well sunken on our premises for drinking water. I wish you to take these two factors into consideration when you apply your charges. We have, my wife and I, two adult children living with us and I am concerned that you will apply your charges based on this aspect and that you will not take into account our special arrangements as above. We are connected to the water mains and we will be happy to pay the minimum standard charges.

Yours Sincerely,

[REDACTED]
