water charges

to whom it may concern

in relation to the water charges, that we will be charged for from next month.

i live on a [REDACTED] Co. tipperary, and have a major problem with these charges for the following reasons:

our water comes through asbestos pipes (not good for your health)

the lime in the water supply is awful, we have had to get a water softener installed at a cost of €900, which uses a bag of salt every 2 days at a cost of €9.00 per bag, and it costs €120 per year for the service of the machine.

we are currently on our third washing machine, second dishwasher, third shower, and approximately eleventh kettle, in the last 4 years.

the backwash on the softener washes every 2 nights which uses 30-40 litres per wash.

so can you please explain to me, how you expect us to pay water charges, when all the above is occurring in our area.

looking forward to your reply
