# Hard Brexit Model

- The market will continue as it is today but the day ahead market will no longer be a cross border market. The local day ahead market will continue as is, including all financial arrangements
- The intraday market will continue as is, as will the balancing market. Cross border trade will continue in the intraday time frames the same as today. We hope liquidity will be drawn to these auctions.
- The forwards market will change, interconnectors will not sell forward products and will instead make the auctions available as they do today for the intraday auctions and earn congestion income from these auctions. For market participants there will be no difference in the intraday auctions.
- We will work with our vendors to implement a new cross border arrangement but we assume this will not be implemented on day 1.
- On day 1 post hard Brexit the key difference will be the removal of the cross border day ahead auction but all other elements of the market will remain the same, provided service providers continue to work with us.
