Comment on Proposed Decision Enduring Connection Policy Stage 2 (ECP-2) CRU/19/143

A chara,

I would like to refer to the above document and the opportunity provided by the Commission for the Regulation of Utilities to comment on same

Specifically I would like to refer to Section 2.12 and the question if stakeholders agree with the proposed final opportunity for capacity release and the terms on which it will be available.

Sonnagh Old Teo is directly affected by this issue. We have an 11.89MW Gate 3 Grid Offer, DG400 Lisbeg and this Grid Offer is now stranded due to refusal of our Planning Application, (subsequent to Galway County Council approval) and the Transitional Arrangements which prohibit re-location.

I have engaged extensively with the CRU on this matter and was afforded the opportunity to present our case at a meeting on 6th Feb 2019.

I further wrote to the CRU on this matter on 4th June 2019.

As we have previously provided a comprehensive presentation of our case I am not going to repeat same.

Sonnagh Old Teo welcomes the CRU Proposal under Section 2.12 and requests that the CRU now enact this proposal.

Many thanks

Mise le meas,

Frank Ó Domhnaill,

For and on behalf of,

Sonnagh Old Teo.
