**Re: Interconnection Agreement for the Interconnection Point at Moffat**

Dear Stephen,

On 16<sup>th</sup> April 2021 GNI submitted to the CRU for approval, an amended Interconnection Agreement between National Grid Gas Plc and GNI (UK) Limited in relation to arrangements at the interconnection point at Moffat. The CRU notes that the amended agreement was also submitted to Ofgem for its approval.

The CRU considers that the proposed amendments should deliver tangible benefits to the market in terms of more efficient use of the compressor stations onshore in Scotland. This should deliver reduced emissions and costs savings to the Irish customer. Based on the above, and following engagement with UR and Ofgem, the CRU hereby approves the amendment of the Interconnection Agreement between National Grid Gas and GNI (UK) Limited as submitted by GNI to the CRU on 16<sup>th</sup> April 2021.

Kind regards,

---

Karen Trant  
Director, Energy Networks and Legal
