Re: PTL Tripartite Agreement in relation to arrangements at the Interconnection Point at Moffat

Dear Stephen,

On 16th April 2021 GNI submitted to the CRU, for approval, an amended Tripartite Agreement between National Grid Gas Plc, GNI (UK) Limited and Premier Transmission Limited. The proposed amendment relates to arrangements at the interconnection point at Moffat. The CRU notes that the amended agreement was also submitted to Ofgem and UR for their approval.

The CRU considers that the proposed amendments should deliver tangible benefits to the market in terms of more efficient use of the compressor stations onshore in Scotland. This should deliver reduced emissions and costs savings to the Irish customer. Based on the above, and following engagement with UR and Ofgem, the CRU hereby approves the amendment of the Tripartite Agreement between National Grid Gas, GNI (UK) Limited and Premier Transmission Limited as submitted by GNI to the CRU on 16th April 2021.

Kind regards,

Karen Trant
Director, Energy Networks and Legal
